SUMMARY

I am a second-year Computer Programming and Analysis student with practical experience building full-stack web and mobile applications using React, Next.js, TypeScript, C#, and cloud platforms. I am passionate about systems architecture and collaborating with teams to produce high-quality digital products, and eager to contribute and grow alongside professional developers.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, C#, C++, PHP, HTML5, CSS3
- **Frameworks & Libraries:** React, React Native, Next.js, ASP.NET, Tailwind CSS, shadcn/ui
- **Tools & Platforms:** Git/GitHub, Supabase (PostgreSQL, Auth, Storage), Microsoft Azure, Vercel, Vite
- **Concepts:** REST APIs, SQL databases, Data Structures and Algorithms, Authentication, Responsive Design, Agile collaboration, Code Reviews

PROJECTS

Receipt Bill-Splitting App

Personal Project | React · TypeScript · Tailwind CSS · Supabase · Vercel

- Built a full-stack receipt-splitting mobile app that lets users scan receipts, assign items, and automatically calculate shared cost
- Implemented authentication and backend data storage with Supabase PostgreSQL
- Deployed the application on Vercel with Git-based preview deployments
- Designed a responsive interface using React, TypeScript, Tailwind CSS, and React Router
- Student Marketplace Platform (SMT)

Student Marketplace Platform (SMT)

Academic Team Project | Next.js · React · Supabase · Tailwind CSS · JavaScript

- Collaborated and led a team of developers to build a buying/selling marketplace for Toronto-area students
- Architected the full-stack application using Next.js for server-side rendering and API routes alongside Supabase for real-time data and authentication
- Contributed to database schema design and component development, and participated in team code reviews and sprint planning
- Integrated the Shadcn/UI component library to deliver a consistent, accessible design system across the platform

Event Ticketing Website

Academic Project | C# · ASP.NET · Microsoft Azure · SQL

- Developed a full-stack event ticketing web application using C# and ASP.NET MVC
- Implemented user authentication, registration, and session-based account features
- Designed and queried a relational SQL database for event listings, ticket purchases, and user records
- Deployed the application and managed data storage on Microsoft Azure cloud services

EDUCATION

George Brown Polytechnic, Toronto, ON | Expected Graduation: 2027

- Computer Programming and Analysis (T177): Object-Oriented Programming, Web Development, Database Design, Software Engineering, Data Structures
- Currently in 2nd year, building real-world applications applying classroom concepts
